Dr. Ruobing Yang

**3:35 PM**

## **Post-Program Reflection and Survey Completion**

Please take a moment to complete your post-program survey.

**3:45 PM**

## **Program Close**

## LEARNING OBJECTIVES

### Approach to Monoclonal Proteins

At the conclusion of this session, the participant will be able to:

1. Determine and manage a monoclonal protein in the community, and to recognize when specialty referral is indicated.

### Parkinson's Disease: Practical Approach to Titrating Meds

At the conclusion of this session, the participant will be able to:

1. Initiate a practical approach to titrating medicines in Parkinson's Disease
2. Integrate strategies for titrating medicines into your clinical practice

### Practical Approach to Managing Individuals with Cirrhosis

At the conclusion of this session, the participant will be able to:

1. Discuss the natural history of cirrhosis and portal hypertension
2. Apply an initial approach to management of common problems in patients with cirrhosis
3. Identify which patients might benefit from referral for liver transplantation

### Sleep Apnea/Sleep Study

At the conclusion of this session, the participant will be able to:

1. Discuss key considerations and health impacts of sleep apnea
2. Integrate an approach to treating sleep apnea including referring for a sleep study
